# Fantastic floors started with **floorwise** in

## 1982 - AN ICONIC YEAR

If you went to the cinema, you'd have most likely seen 'ET – the Extra Terrestrial', a relatively low budget new film by Steven Spielberg which went on to become one of the highest grossing movies of all time - even surpassing Star Wars.

In the intermission, there were some classic adverts with brilliant straplines like 'Possibly the best lager in the World'. Better still, whilst you were watching the film, you wouldn't have been irritated by the constant interruption and screen light from mobile phones - a new technology still in its infancy.

# 1982

Against this backdrop, The Floorwise Group Ltd. was incorporated in 1982 by a group of independent flooring wholesalers seeking to improve their buying power and to provide trade customers with better quality and value across a range of flooring installation products and accessories.

Over the last 40 years, Floorwise - like mobile phone technology - has constantly moved with the times, improving exponentially and building an ever-wider catalogue of award-winning flooring products. This includes now legendary products like Diamond Gripper and F599 Spray Adhesive alongside innovative new ones like our new Dichloromethane-Free F597 Spray Adhesive.

Today, Floorwise has become the trusted source for installers covering everything from underlays, gripper and profiles, to adhesives, screeds, tapes and a world-class collection of tools from leading brands.

With its distribution depots providing the exceptional quality and value of Floorwise products with the benefits of independent, local service, for many installers it's an unbeatable combination.

**So an awful lot has changed over the past 40 years - but if you still want great products and prices from friendly local experts, contact your local Floorwise distributor today and find out why Fantastic floors start with Floorwise.**

**Probably the best underlay in the world.**

Since 1982, we've been supplying some of the best underlays in the world (probably) from our own specifications. From our first ever roll of SXX on the floor to our F597 underlay, right down to the most advanced F597 underlay, Floorwise underlays have been at the heart of Fantastic Floors for 40 years - and that's something to be proud of.

Today, Floorwise continues to supply some of the best underlays in the world (probably) from our own specifications for use with carpet, wood, laminate, luxury vinyl tile and more. The underlay is made from a range of materials and is available in a variety of thicknesses and widths. Floorwise underlays have been at the heart of Fantastic Floors for 40 years - and that's something to be proud of.

40<sup>th</sup> anniversary 

**Great ideas tend to stick around.**

Since 1982, we've been supplying the flooring industry with products and services that have stood the test of time. Originally created for a group of independent wholesalers, we've grown into a major business, serving a wide range of customers with great quality and value.

From its humble beginnings, Floorwise has grown into one of the industry's most respected flooring installation and accessories brands, with a network of 25 distribution depots throughout the UK and Ireland. Floorwise has been at the heart of Fantastic Floors for 40 years - and that's something to be proud of.

# Underlay

<b>Carpet Underlays</b>	<b>6</b>
<b>Feel the Difference</b>	<b>8</b>
<b>PU Foam Underlays</b>	<b>10</b>
<b>Carpet Underlay Selector</b>	<b>16</b>

There are a wide range of underlay options available today; each has its own strengths and weaknesses so care should be taken in selecting the most suitable for your project.

## PU Foam Underlays The market leader!

Although light in weight, PU foam underlays pack a real punch when it comes to comfort and performance. Being under half the weight of traditional rubber underlays means that they can easily be handled on site in line with current health and safety regulations.

They are made from recycled post-industrial foam which is compressed and re-bonded to create a wide range of thicknesses and densities to suit a variety of applications and budgets.

The use of recycled materials helps to keep costs to a minimum making foam underlays excellent value for money and once they have reached the end of their useful life they are also 100% recyclable making them kinder to the environment – all of which explains their enduring popularity.

## Bouncebackability Index

Underlays are a great way to increase the comfort and durability of your flooring - but every underlay material has its own strengths and weaknesses to consider. This is where understanding bouncebackability can help decide what is best for you.

Bouncebackability considers the impact of density on an underlay as an Ultra High Density underlay will typically have over twice the weight of foam as a Medium Density underlay, compressed into the same volume. This increased density gives greater resistance to compression making it feel firmer underfoot. The higher foam densities are therefore ideal for use in more heavily trafficked areas such as halls, lounges and landings, and commercial applications. In contrast, lower density foams are great for lower trafficked areas where you may be barefoot and appreciate a softer feel, such as bedrooms.

The balance of comfort and durability greatly depends upon the flooring type, the place it is to be laid and the footfall expected. Our bouncebackability chart helps to explain how a higher density underlay will initially feel much firmer underfoot but will be more consistent as it better resists the longer-term compression forces generated through footfall. In contrast a lower density underlay will initially feel softer but this will decrease more rapidly as the foam compresses underfoot.

## Blown Rubber

Formed under intense heat to create pockets of air, this type of rubber underlay delivers increasingly higher levels of comfort and durability depending upon thickness and density.

## Crumb Rubber

Crumb rubber underlays are made using the rubber from recycled car tyres. They have the best durability and recovery ratings of all underlays. Suitable for areas of heavy wear in both residential and commercial installations, for many, these are the ultimate performance underlays, providing the best support for your carpet.

## Rubber Underlays

These more traditional underlays deliver an excellent balance of comfort and durability whilst their exceptional density provides excellent acoustic insulation properties.

## Wool Felt Underlays

As one of the original carpet underlays, wool felt continues to be the natural choice for your carpet. With exceptional heat insulation properties, wool felt underlays have great bedding down qualities and are extensively used with woven backed carpets. Made from recycled wool, jute and synthetic fibres these underlays are fully recyclable after their long use.

## Combination Crumb Rubber/Wool Felt Underlays

These combination underlays provide the exceptional recovery properties of crumb rubber, with the great bedding in and heat insulation properties of wool felt.

## Underlay Density

The denser the underlay, the more durable it is and the better it will perform over time. We offer 6 density categories as follows.

## Comfort

Comfort underfoot is primarily influenced by underlay thickness (although density also plays a part), with the thickest being the most comfortable. We offer underlays in a range of thicknesses.

Using premium materials for underlays of exquisite quality. Feel the Difference is a collection that truly delivers comfort and luxury under your feet.

# Carpet Underlay Selector

**Key** ✓✓ Recommended ✓ Suitable ✓\* Stretch Fit installations only

Each Floorwise underlay has unique performance characteristics. We have included a recommendation table for you to be able to easily compare the underlays. Please note that generally the thicker the underlay, the better the underfoot comfort, whilst the greater the density the better the underlay will perform over time.

The table includes a classification column, which rates the underlay to BS EN 14499 standards. Also included in the table are TOG ratings, with some underlays being better insulators than others. Finally, there is an impact sound rating, which is a guide to how well the underlay suppresses noise from the room above.

# Wood, Laminate and LVT Underlays

<b>Acoustica Gold Excel</b>	<b>21</b>
<b>Acoustica Silver</b>	<b>21</b>
<b>Acoustica Fibreboard</b>	<b>21</b>
<b>Wood, Laminate and LVT Selector</b>	<b>22</b>

Floorwise brings together a wide range of different types of non-carpet underlays.

Floorwise brings together a wide range of different types of specialist underlay for use under Wood, Laminate and LVT flooring. These underlays are thinner than those used under carpets and are ideal for helping to provide cushioned support and absorbing minor surface imperfections making for an easy installation that will prolong the life of your floorcovering. Equally importantly they will significantly reduce the sound made by wood, laminate & LVT floorcoverings making for a nicer living environment.

The Floorwise acoustica range of dense rubber underlays are excellent at absorbing noise, both between floors by way of impact sound reduction and within the room through airborne noise reduction.

The whisper range of PE foam underlays are also very good at absorbing impact noise but do not perform to the same standards as the acoustica range for airborne sound. The Floorwise range of wood, Laminate and LVT Underlays is all rated according to our Sound Reduction guide to help decide which product will be best for your project.

<b>USR+</b>	<b>PSR+</b>	<b>ESR+</b>	<b>GSR+</b>	<b>BSR</b>
<b>Ultimate Sound Reduction</b>	<b>Premium Sound Reduction</b>	<b>Enhanced Sound Reduction</b>	<b>Good Sound Reduction</b>	<b>Basic Sound Reduction</b>

## Wood, Laminate and LVT Selector

Each Floorwise underlay has unique performance characteristics. We have included a recommendation table for you to be able to easily compare the underlays. Please note that generally the denser the underlay the better it is at reducing sound, which is why Rubber underlays are generally the best option for this application.

Range name	Application					Material	Specification			Specification				
	GB	MB	L/DR	H,S,L	Comm		Density kg/m <sup>3</sup>	Roll weight kg	Moisture barrier	Thickness (mm)	Dimensions w x l = m2	Sound performance class	TOG	Impact sound dB

## Plywood, Hardboard and Paper Felt

### SP101 Flooring Plywood

5.5mm

#### DESCRIPTION

SP101 Flooring Plywood® has been developed to exceed BS8203 standards as a fully reliable underlay meant for use in the sub-floor preparation in readiness for all types of floorcovering.

Available in a range of thicknesses and sizes.

#### BENEFITS

- ✓ Meets BS8203: 2017 – Plywood Annex A
- ✓ TFT Woodexperts Diamond Mark Certified
- ✓ High quality face veneers
- ✓ Reliable glue line performance
- ✓ Accurate dimensional tolerances
- ✓ Recommended by most flooring manufacturers

### Hardboard

3.2mm

#### DESCRIPTION

Our hardboard is a versatile general purpose fibreboard usually used for levelling uneven floorboards.

### Paper Felt

#### DESCRIPTION

Our quality lining paper helps protect the subfloor and prevents dust from rising through the floorboards. Available in a range of weights and roll sizes.

#### Weights

TBC: i.e 1m x 50m 175 gsm or 1m x 100m 175 gsm or 2m x 100m 150gsm

## Scotia

### F541 Scotia

#### DESCRIPTION

Wood foiled  
16.5mm x 16.5mm x 2.4m

Used to cover the expansion gap on wood and laminate floors.

Available in a wide range of decors, ask your local distributor for a set of colour samples.

For prices contact your nearest distributor – see back cover

# Adhesives and screeds

Levelling and Smoothing Compounds	27
Flooring and Cartridge Adhesives	28
Spray Adhesives	29

Floorwise supply the flooring professional with a versatile range of high-quality adhesives and levelling compounds which won't let you down on the job!

All contractors know that the perfect floor needs a perfect base and our range of screeds and levelling compounds cover every need in order to achieve this.

Next they require is an adhesive that holds fast and lasts the course – contractors who try Floorwise adhesives stick with them.

Floorwise won't let you down when it comes to product quality, availability or supply.

## F5GOLD Pro-Screed Gold

### Part rapid setting latex polymer levelling & smoothing compound

A versatile 2-part latex polymer levelling and smoothing compound with excellent flow and adhesion properties. The unique formulation qualities allow the compound to be installed without the need to prime on most sub floors including timber. It is moisture tolerant and can be laid under and over DPM's and can be applied over most underfloor heating systems.

<b>WALK ON TIME :</b>	90 Minutes
<b>WORKING TIME :</b>	Approximately 20 minutes
<b>APPLY FLOORCOVERING :</b>	Typically 4 hours (3 hours for ceramic tiles)
<b>COMPRESSIVE STRENGTH:</b>	C16 after 28 days
<b>APPLICATION THICKNESS:</b>	Featheredge to 10mm unfilled. From 10mm to 30mm filled with 3mm granite chippings
<b>COVERAGE</b>	5–6m <sup>2</sup> @ 3mm per 20kg bag + 5L liquid

## F599 Heavy Duty Spray Adhesive

### Spray adhesive

This market-leading Floorwise heavy duty spray adhesive can be used to fix a wide variety of floor coverings onto most sub floor types. This is thanks to F599 offering a higher percentage of solids than many other spray adhesives giving it a competitive advantage.

<b>COVERAGE :</b>	Approx. 3m <sup>2</sup> per can onto a single non-porous surface
-------------------	--

- Higher solids providing you more adhesive per can
- Higher coat weight giving you more surface adhesive
- Excellent bond strength
- Super quick drying

Not suitable for highly plasticised Vinyls or PVC

# Gripper

<b>Diamond Gripper</b>	<b>33</b>
<b>Premium Gripper</b>	<b>33</b>

Floorwise supplies a range gripper options to suit almost any installation.

## Diamond Gripper

Our Diamond Gripper range is both thicker at 6.3mm and wider at 25mm than most other grippers but it also has up to 20% more pins and nails than found on an entry level standard gripper. The pre-set fixing nails are designed for use with concrete, timber or mixed flooring substrates making it easier to install. Similarly the pins are zinc coated for added durability and have a choice of medium or long pins to suit differing carpet types providing greater long-term stability for the carpet thereby extending its service life.

We recommend using Diamond Gripper for commercial power stretching installations.

## Premium Gripper

The Floorwise Premium Gripper range is again thicker at 6.0mm and wider at 22mm with more pins and nails than you would find in a standard budget gripper. The pre-set fixing nails designed for use with concrete, timber or mixed flooring substrates make it easier to install whilst the increased pin count and option for short, medium or long pins to suit the individual carpet type offers greater long-term stability for the carpet.

## Gripper

Product		Specification	
Code	Product name	Pins/nails	Nail length (mm)
<b>TIMBER FLOORS</b>

# Stair Nosings, Skirtings and Trims

Aluminium Stair Nosings	45
Q-Range	46
Aluminium and PVC Stair Edge Trims and Angles	48
Floormitre Cap and Cove Systems	48
Flexible Bevels, Ramps, Profiles and Joints	49
PVC Skirtings	50
Nosings, Trims and Skirtings colour chart	52

Stairs are an inherently dangerous part of any building presenting both a trip and a fall hazard, so don't skimp when it comes to safety.

Floorwise offer a range of nosings with flat, raked or bullnose profiles to suit almost any stair application and floorcovering along with a selection of edge trims and angles to help you get the perfect finishing detail.

We also offer a wide range of colour options as well as a selection of standard tread or supergrip inserts to suit your specific application.

## Aluminium Stair Nosings

### Standard gauge

Standard gauge aluminium stair nosings best suited for floorcoverings with a thickness of 2mm–3.5mm.

SF11 - single channel flat

SF31 - single channel bullnose

SF51 - single channel raked

SF22 - double channel flat

SF62 - double channel rake

SF141 - single channel flat - ramp back

SF151 - single channel raked - ramp back

SF161 - single channel bullnose - ramp back

### Heavy duty gauge

Heavy duty gauge aluminium stair nosings best suited for floorcoverings with a thickness of 4mm–7mm.

HF11 - single channel flat

HF31 - single channel bullnose

HF51 - single channel raked

- Stock lengths: 2.44m, 2.75m and 3.2m
- Pre-packed (secret fixing): 20 lengths x 1.22m
- Also available cut to size, drilled & undrilled

- Brightened Finish
- Super Chrome Finish

### Colours

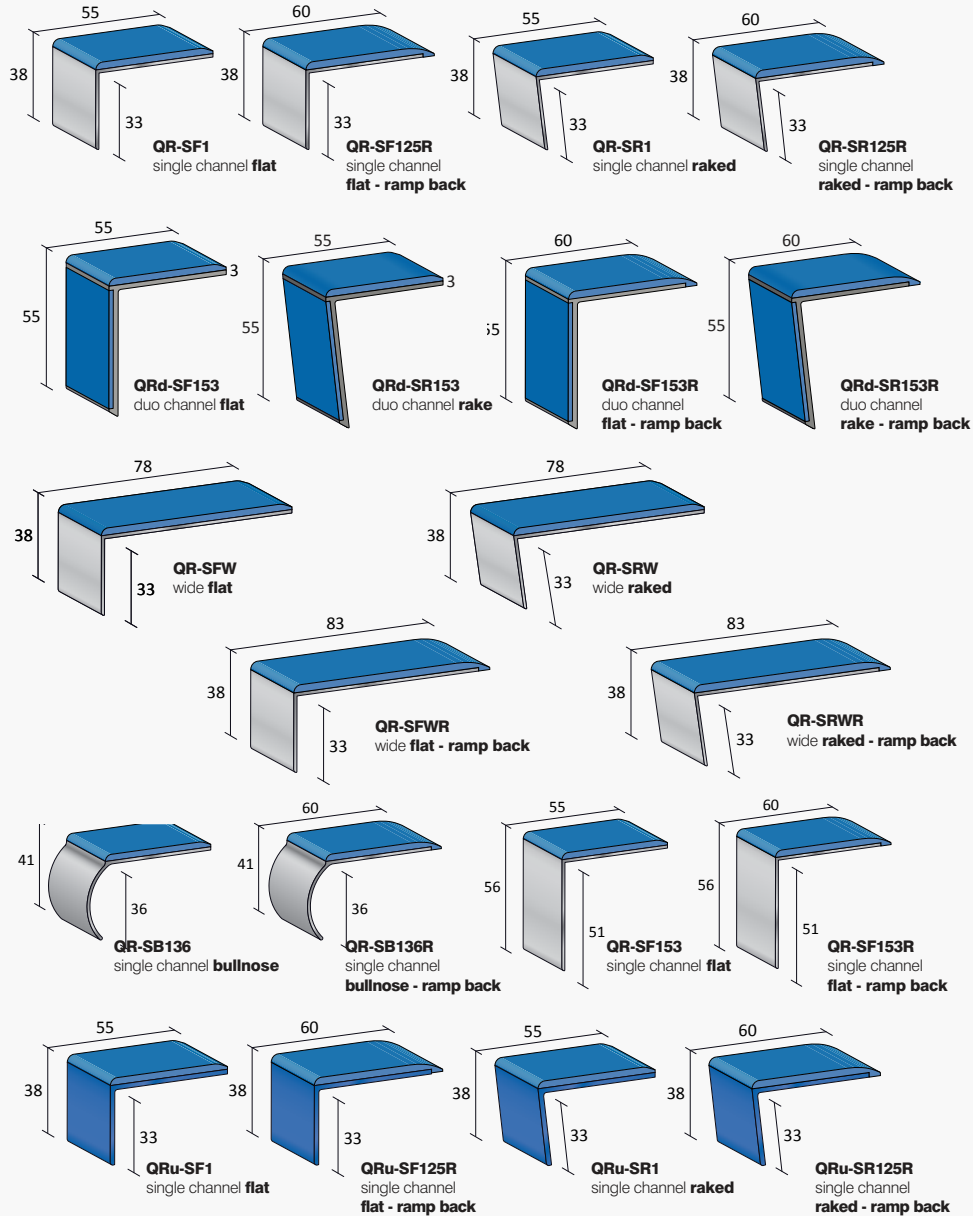

The product code for ordering Stair Nosings is made up of the relevant part number above and the 3-letter colour code shown on page on page 52. The code for a SF11 Single Channel nosing in Poppy would therefore be SF11POP.

Drawings not to scale.

## Q-Range

### Slenderline gauge

Stair nosings best suited for floorcoverings with a thickness of 0mm–3.5mm

### Heavy duty gauge

Stair nosings best suited for floorcoverings with a thickness of 4-7mm

### Building regulations best practice

All Q-Range stair nosings (except bullnose) offer a Building Regulations best practice solution in PVCu or when specified with polar grey tread material.

NOTE: There should be 30 points of difference in the LRV value between the floor covering and the stair nosing.

- Stock lengths: 2.44m, 2.75m and 3.2m
- Pre-packed (secret fixing): 20 lengths x 1.22m
- Also available cut to size, drilled & undrilled

- Brightened Finish
- Super Chrome Finish

### Colours

The product code for ordering Stair Nosings is made up of the relevant part number above and the 3-letter colour code shown on page 52. The code for a QR-HF1 Single Channel nosing with Yellow Tread would therefore be QR-HF1YEL.

Drawings not to scale.

## Aluminium and PVC Stair Edge Trims and Angles

Pre-formed universal angles for finishing step sides on open string staircases. Special shapes, bespoke to project are available on request and subject to lead times.

**A610**  
Aluminium 83° pre-formed Angles

**A620**  
Aluminium 90° pre-formed Angles

**A600**  
Aluminium stock length 2.75m

**P610**  
PVCu 83° pre-formed Angles

**P620**  
PVCu 90° pre-formed Angles

**P600**  
PVCu stock length 2.75m

- **Universal tabs** are included with package to cover all heights.
- **Pre-formed:** 83° or 90°, 360mm x 360mm, singles or boxed in 20s.
- **Stock lengths:** 2.75m complete with joints and tabs to make up on site.

- Brightened Finish
- Super Chrome Finish

## Floormitre Cap and Cove System

### Internal and external floormitres

Designed to make the fitting of vinyl around corners easier, quicker and smoother.

**CCFM1**  
Internal Floormitre  
50 per box

**CCFM2**  
External Floormitre  
50 per box

## Flexible Bevels, Ramps, Profiles and Joints

### Bevel strips and ramp edges

Flexible finishing strips and ramps for floorcovering edges. Can be easily curved on site.

**8751**  
**25 x 2mm**

5m coils  
5 per box

**8752**  
**25 x 2.5mm**

5m coils  
5 per box

**8753**  
**25 x 3.2mm**

25m coils  
5 per box

**8754**  
**33 x 4.5mm**

2m lengths  
50 per box

**8755**  
**38 x 6.0mm**

2m lengths  
50 per box

### Flexible flooring profiles

Finishing profiles for joints between floor coverings. Can be easily curved on site.

**8770 Dual Edge**  
**35 x 5mm/9mm**

2m lengths  
25 per box

**8772 Ramp Edge**  
**40 x 5mm**

2m lengths  
25 per box

### Expansion joints

Finishing profiles for joints between floor coverings. Can be easily curved on site.

**QCJ50**  
**50 x 2.5mm**

15m coils  
3 per box

**QCJ75**  
**75 x 2.5mm**

15m coils  
2 per box

### Colours

The product code for ordering Flexible Bevels, Ramps, Profiles and Joints is made up of the relevant part number above and the 3-letter colour code shown on page on page 52. The code for a 8770 Dual Edge profile in Charcoal would therefore be 8770CHA.

Drawings not to scale.

## PVC Skirtings

### Sit-on skirting

Easy to fit standard skirting finish for vinyl floors.

- 8710**  
100mm  
2m lengths / 30 per box
- 8710C**  
100mm  
32m coil (curve on site)
- 8711**  
75mm  
2m lengths / 40 per box
- 8712**  
150mm  
2m lengths / 20 per box

### Set-in skirting

Skirtings with welded foot for seamless and hygienic finish with vinyl floors in hospitals, schools and wet areas (e.g. bathrooms).

- 8720**  
**100 x 2.0mm**
- 8721**  
**100 x 2.5mm**
- 8722**  
**100 x 3.2mm**
- 8723**  
**150 x 2.0mm**
- 8724**  
**150 x 2.5mm**

2m lengths  
14 per box

2m lengths  
14 per box

### Flat skirting

Protective edge to wall and door bases. Use with vinyl floors or carpet tiles.

- 8761**  
**100mm**  
32m coil
- 8762**  
**150mm**  
32m coil
- 8763**  
**300mm**  
16m coil

### Capping strips

Finishing caps for floor coverings when material is formed up the wall base.

- 8740**  
**40 x 4mm**  
2m lengths  
40 per box
- 8741**  
**45 x 4mm**  
2m lengths  
40 per box
- 8742**  
**40 x 6mm**  
2m lengths  
50 per box
- 8744**  
**38 x 4mm**  
25m coils only  
3 per box

### Cove formers

Preformed cove support for vinyl or linoleum flooring to curve up the wall base from the floor edge.

- 8731**  
**20 x 20mm**  
2m lengths  
50 per box  
(Black only)
- 8730**  
**32 x 32mm**  
2m lengths  
40 per box  
(Black only)
- 8732**  
**35 x 35mm**  
2m lengths  
40 per box  
(Black only)

- 8733**  
**42 x 42mm**  
2m lengths  
20 per box  
(Black only)

2m lengths  
20 per box  
(Black only)

### Combined cove former and capping strip

This combined, preformed cove former and capping strip is a valuable time saver on site.

- 8743**  
**100 x 32mm**  
2m lengths / 20 per box

### Colours

The product code for ordering Capping Strips is made up of the relevant part number above and the 3-letter colour code shown on page on page 53. The code for a 8740 Capping Strip in Dark Brown would therefore be 8740DBR.

Drawings not to scale.
